

Demo PDF for PDF-to-Audio Application

This is a sample one-page PDF created for testing a PDF to Audio conversion application. The purpose of this document is to verify that text can be extracted correctly and converted into natural-sounding speech using text-to-speech technology.

Key Features to Test

1. Upload the PDF successfully.
2. Extract readable text from the document.
3. Generate an MP3 audio file.
4. Test different voice options such as English Female, English Male, Indian English Female, and Indian English Male.
5. Play and download the generated audio.

If you can clearly hear this paragraph in the generated audio, then your application is working correctly. This document contains only standard text and should be easy to process for testing purposes.
